## **DETAILED ACTION**

This Office Action is in response to the amendment filed 28 April 2005.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fujimori et al. (U.S. Patent 6,674,109) in view of Halliyal et al. (U.S. Patent 6,674,138).

Fujimori discloses a flash memory device (Figs. 1 and 2) that contains a semiconductor substrate (1), a source region (2) and drain region (3) with a channel therebetween, a metal floating gate electrode (6) that is formed on the channel region with a gate insulator film (5) formed therebetween, a metal ferroelectric film (7) formed on the floating gate, a control gate (8) that is formed on the ferroelectric film, an intermediate insulator film (10) formed directly between the floating gate and the ferroelectric film and between the control gate and the ferroelectric film. The intermediate insulator can be formed between the floating gate and ferroelectric film. (Column 6, lines 8-12) Fujimori discloses all the limitations except for the intermediate insulator to comprise hafnium oxide with nitrogen atoms. Whereas Halliyal discloses a flash memory device (Fig. 2) that contains an intermediate insulator film (28) formed on

Application/Control Number: 10/616,917

Art Unit: 2822

hafnium oxide with nitrogen atoms of not less than 0.1-20 atomic %. The implantation of nitrogen atoms is between the ranges of 0.1-30 atomic %, 0.5-10 atomic % and 1-6 atomic %. The intermediate insulator film is formed of hafnium silicon oxynitride to replace a nitride layer to allow a low electrical thickness to be achieved even with a physically thick layer. (Column 6, lines 20-24, Column 13, lines 25-36) Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the device of Fujimori by incorporating the intermediate insulator film to be hafnium oxide with nitrogen atoms to allow a low electrical thickness to be achieved even with a physically thick layer as taught by Halliyal.

## Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Application/Control Number: 10/616,917

Art Unit: 2822

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kiesha L. Rose whose telephone number is 571-272-1844. The examiner can normally be reached on M-F 8:30-6:00 off 2nd Mondays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amir Zarabian can be reached on 571-272-1852. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
